ABOUT ME

I'm a UI Designer with 8 years of experience designing engaging and user-friendly interfaces for native and web applications for both desktop and mobile.

As a Designer, I wear many hats, and I'm involved in numerous roles such as managing multiple projects, UI of mobile apps, brand consultation, user research, marketing, and idea creation. I'm a creative problem solver, carefully combining design and marketing ideas, resulting in well-formulated design solutions.
